SUMMARY

Entry-level Software Engineer / Backend Developer with strong foundations in Data Structures, OOP, Java, Spring Boot, REST APIs, and MySQL. Experienced in building real-world full-stack applications using React and Git, with strong problem-solving ability demonstrated by solving 1000+ DSA problems across various coding platforms.

EDUCATION

Aditya College of Engineering and Technology Surampalem
Bachelor of Technology – Computer Science Engineering | CGPA: 7.83 2022 – 2026

SKILLS

Programming Languages: Java, C++, Python, C

Frontend: HTML, CSS, JavaScript, Bootstrap

Tools: Git, GitHub, Docker, Postman, VS Code, Jupyter, Eclipse

Databases: MySQL, MongoDB

Core CS: DSA, OOP, Computer Networks, Operating Systems

Libraries/Frameworks: Spring Boot, Spring Data JPA, Hibernate, Numpy, Pandas

EXPERIENCE

Coding Intern - Technical Hub Pvt Ltd July 2025 - Nov 2025

- Assisted in training 500+ students in Java, C++, Data Structures, and C through interactive sessions.
- Strengthened problem-solving and coding proficiency via hands-on practice and mentoring.
- Conducted doubt-clearing and code-review sessions to improve conceptual understanding and coding accuracy.

Data Analysis Trainee - APSSDC May 2025 - July 2025

- Performed exploratory data analysis on urban versus rural literacy trends across Indian states.
- Designed visualizations to highlight gender-wise graduation disparities and literacy gaps.
- Implemented K-Means clustering to categorize states for data-driven insight discovery.

TECHNICAL PROJECTS

Online Examination System — Spring Boot, MySQL, React, Tailwind CSS | [Code](#)

- Developed secure Admin and Student authentication with role-based access control.
- Designed and implemented RESTful APIs using Spring Boot (Controller, Service, Repository layers) and MySQL, following MVC architecture and tested endpoints using Postman.
- Implemented automatic exam evaluation and result generation to reduce manual effort.

Employee Management System — Spring Boot, PostgreSQL, HTML, CSS, JavaScript | [Code](#) | [Live Demo](#)

- Built RESTful APIs using Spring Boot to perform employee create, read, update, and delete operations.
- Implemented layered architecture with Controller, Service, and Repository layers.
- Developed a responsive frontend using HTML, CSS, and JavaScript for smooth interaction.

Spam Email Detection System — Python, TensorFlow, Scikit-learn, NumPy, Pandas | [Code](#)

- Developed a machine learning model to classify emails as spam or non-spam.
- Performed data preprocessing, feature extraction, and model training.
- Used visualization techniques such as word clouds and plots for data insights.

ACHIEVEMENTS

- Awarded for outstanding performance in typing test conducted during 2nd year of BTech (Max Speed: 80 WPM).
- Earned 5-star badges in Python, C++, SQL, Problem Solving, 30 days of code, 4-star badge in C in HackerRank.
- Solved 1000+ DSA problems across different platforms including LeetCode, GeeksForGeeks and CodeChef.

CERTIFICATIONS

- Python Certification - Pearson IT Specialist | [Link](#)
- Java Certification - Pearson IT Specialist | [Link](#)
- HTML and CSS Certification - Pearson IT Specialist | [Link](#)
- Advanced Programming in C++ - Cisco | [Link](#)
- Programming Essentials in C - Cisco | [Link](#)

CODING PROFILES

- LeetCode - [Profile](#)
- GeeksforGeeks - [Profile](#)
- HackerRank - [Profile](#)
- CodeChef - [Profile](#)
